OFFICE OF THE PUBLIC PRINTER

FOREWORD

For over a century the depository library program, operating under various Federal statutes, has provided the general public with access to publications of the United States Government. Congressional designation of selective and regional depository libraries has made this program national in character and scope.

Currently, the depository library program is distributing more than 3,800 classes of Government publications to a broad range of libraries. The 1,217 designated depositories include libraries of Federal and State Governments, colleges and universities, special and public libraries.

In operating the depository library program, the Public Printer and the Superintendent of Documents have had the excellent professional advice of the Depository Library Council to the Public Printer. Council members have generously given of their time and thought to help the program better serve the public and the libraries which implement it. Their recommendations have now brought forth specific guidelines designed to make the program even more effective.

To all connected with the shaping of these guidelines, let me extend the thanks of the Public Printer and the Superintendent of Documents. They represent a remarkable effort from their genesis within the Council in 1974, and the creation of a Committee on Standards chaired by a most patient and persistent documents librarian, Catharine Reynolds. Many others worked with her subsequently in disseminating drafts through Public Documents Highlights to the large community of documents librarians. The thoughtful responses of hundreds of librarians working daily with documents were integrated into this final document. It bears the stamp of participatory professionalism in the finest sense, and will go far in making the publications of our Federal Government more readily accessible to all citizens through the depository library program.
